Master's Degree Programs

The eCampus offers the following graduate degree programs online:

Master of Business Administration

The purpose of the Master of Business Administration program is to offer students an opportunity to acquire proficiency in general business management and decision making skills which will enable them to carry out managerial responsibilities in both the private and public sectors..

Master of Science in Criminal Justice

The Master of Science degree in Criminal Justice is designed to broaden and enhance each student's ability to understand, analyze and evaluate issues that confront the American criminal justice system.

Rated 2nd in the *“Top 10 Values for Online Master’s Degree in Criminal Justice”* by CollegeCrunch.org

Master of Science in Post Secondary Education

The Master of Science in Post Secondary Education Program is designed to prepare new entrants to the field of post secondary education as professional practitioners in a selected area of study. The 10-course option (30-semester hour's program) is available to students which include a core of required courses and the completion of an approved 18-semester-hour concentration.

Available concentrations: Adult Education, Foundations of Education, Instructional Technology

Master of Science in Human Resources Management

The Master of Science in Human Resource Management (MSHRM) is a specialized professional program designed to offer the student an opportunity to obtain proficiency in contemporary human resource management concepts, activities, and skills, particularly as they are applied to developing and executing human resource management systems in support of strategic organizational objectives.

Master of Science in International Relations

The Master of Science in International Relations (MSIR) degree program is a 12-course, 36-credit-hour curriculum of study designed to provide students the foundation and knowledge needed for understanding the conduct of international relations.

Available concentrations: Global Studies, National Security Affairs, Regional Affairs

Master of Science in Management

The purpose of the Master of Science in Management program is to provide a specialized professional program for the student who wants to acquire proficiency in management skills, including decision making, which will enable the graduate to carry out responsibilities in both general and specialized managerial roles. Concentrations in Human Resource Management, Information Systems, Leadership and Organizational Effectiveness, International Management, and Healthcare Management further develop managerial problem solving skills in specific areas of applied management.

Available concentrations: Human Resource Management, Leadership and Organization Effectiveness, International Management, Healthcare Management, Information Systems

Master of Public Administration

The MPA degree is a 12-course, 36-credit-hour curriculum of study. Students with less than one-year of work experience will complete an additional three-hour internship course for a total of 39 credit hours.

Available concentrations: Education, Government Contracting, Health Care Administration, Justice Administration, National Security Affairs, Nonprofit Management, Public Human Resource Management, Public Management
